SKILLS

- **Languages**: C, C++, JavaScript, Python
- **Frontend Development**: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Design
- **Backend Development**: SpringBoot, Django, Node.js, RESTful APIs, JWT Authentication and Authorization, MVC
- **Database and its Management:** MongoDB, MySQL, SQL, Data Modeling, CRUD operations
- **Tools and Deployment**: AWS (EC2, S3, IAM), Git, GitHub, Postman, Render, Version Control
- **Soft Skills**: Problem-Solving, Teamwork, Communication

PROJECTS

Vantis – AI- Powered Computer Voice Assistant | Github June' 2026 – Sept' 2026

- Developed an AI-powered desktop voice assistant using Python that enables users to control computer operations through natural-language voice commands.
- Designed a modular command-processing architecture integrating AI-based intent understanding with keyboard, mouse, application, screen, and system automation.
- Implemented voice interaction using speech recognition and text-to-speech, enabling hands-free operations such as launching applications, typing, scrolling, clicking, clipboard actions, and system controls.
- Built a standalone desktop application with a graphical interface and packaged the system as a distributable Windows application for seamless end-user usage.

  Tech stack: Python, Gemini API, PySide6, pyAutoGUI, psutil, Windows APIs, PyInstaller

Expense Tracker – Personal Finance Management App | Github | Link Jan' 2026 – Mar' 2026

- Built a full-stack expense tracking application using React.js, Node.js, Express.js, and MongoDB to manage, categorize, and visualize daily financial data.
- Architected a high-availability backend utilizing MVC principles, enabling seamless integration of over 10 new features and enhancing overall system stability.
- Implemented secure authentication and authorization using JWT and developed interactive dashboards with Chart.js to provide real-time spending insights.
- Optimized RESTful APIs and CRUD operations while integrating advanced filtering and category-based analysis, improving performance and driving 100+ monthly user interactions.

  Tech stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Chart.js, Render

Travel Mate– Travel Management Platform | Github Oct' 2025 – Nov' 2025

- Developed a **f**ull-stack travel management platform using React.js, Node.js, Express.js, and MongoDB to streamline trip planning, itinerary management, and budget tracking in a unified system.
- Designed a scalable backend architecture with structured RESTful APIs for trip creation, itinerary updates, and expense management, ensuring efficient data handling and system reliability.
- Implemented secure authentication and authorization using JWT, enabling personalized and protected user experiences.
- Integrated features like day-wise itinerary planning and expense tracking, reducing dependency on multiple tools and simplifying end-to-end trip management.

  Tech stack: React.js, Node.js, Express.js, Tailwind CSS, MongoDB, Socket.io, Geolocation API

CERTIFICATES

- Intern2Grow – React.js Developer | **Link** Nov'2026
- NPTEL - Cloud Computing online certification | **Link** Oct' 2025
- Techvanto Academy - Live Internship in Data Structures & Algorithms | **Link** July' 2025

ACHIEVEMENTS

- Solved 500+ DSA problems across LeetCode, HackerRank, GFG, Codeforces – codolio
- Finalist – Amongst the 5 finalists of Build-a-thon Hackathon Apr'2025

EDUCATION

Lovely Professional University Punjab, India
Bachelor of Technology (Computer Science and Engineering); ***CGPA: 6.9*** *Aug' 2023 – present*

Aadharshila Sr Sec School Palampur, Himachal
Intermediate; ***Percentage: 75.6*** *May' 2022 – Mar' 2023*

Aadharshila Sr Sec School Palampur, Himachal
Matriculation; ***Percentage: 88.4*** *May' 2020 – Mar' 2021*
